3. Better Collaboration Between The Administration And The Business Should Be Encouraged Mr. Katrieli in interview for Economic.bg from 17.11.2017

Avinoam Katrieli, President of Binational Chamber of Commerce Bulgaria-Israel and investor of ‘Plana Heights’ project.
The difficulties facing the big investors in Bulgaria are connected mostly with the administrative system. The administrative system is not motivated to solve problems and overcome challenges. Many of the clerks are trying to do the minimum possible or even nothing at all of what is needed. And that is the true "Achilles Heel" (weakness point) for doing business in Bulgaria.
The second problematic part of making business in Bulgaria I can define with subtitle “criminal”. I will give you an example - certain people allow themselves to put investors under pressure and even to blackmail them. Often they are dressed in suits of positive ideas or hiding behind green organizations agenda for nature protection, but actually these people are making purposefully problems to the business. I address all of my colleagues, investors and businessmen in Bulgaria not to succumb to and not to forgive those circles of people in our society. Such deeds and practices as well as the complaints sent from the business should be made known to all as official information. Let's treat the administration more strictly in such matters and without fear and definitely without allowing to give illegal bonuses. I appeal to the Bulgarian Government to prepare punitive measures to address such illegal activities. Media link /in bulgarian/ www.economic.bg Link to BCCBI:
